PROFESSIONAL SUMMARY

Software Developer with strong foundation in Python, Data Structures and Machine Learning, supported by a certified 6-month AI & ML internship. Experienced in developing real-time applications and backend logic using Python and computer vision technologies.

TECHNICAL SKILLS

Programming: Python, Java (Basics)

Web Technologies: HTML5, CSS3

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Problem Solving, Basic SQL Queries

Database: MySQL

Tools: Git, GitHub, VS Code, PyCharm

INTERNSHIP EXPERIENCE

Artificial Intelligence & Machine Learning Intern – Rooman Technologies (6 Months)

- Developed on Machine Learning and Deep Learning models using Python
- Performed data preprocessing, model training and evaluation
- Built AI-based projects using CNN and OpenCV

PROJECTS

Gesture Controlled Virtual Mouse (2025)

GitHub: <https://github.com/Prajwalnj19/Gesture-Controlled-Virtual-Mouse>

Developed a real-time virtual mouse using Python, OpenCV and MediaPipe with hand landmark detection to control cursor movement and click actions via webcam.

Pneumonia Detection using CNN (2025)

GitHub: <https://github.com/Prajwalnj19/Pneumonia-Detection>

Built a deep learning model using CNN (TensorFlow/Keras) to detect pneumonia from chest X-ray images with image preprocessing and dataset splitting.

Traffic Sign Detection using CNN (2025)

GitHub: <https://github.com/Prajwalnj19/Traffic-Sign-Detection-Using-CNN>

Developed CNN-based image classification model using Python and OpenCV for dataset preprocessing and multi-class recognition.

Campus News and Announcement Website (2024)

Developed responsive website using HTML and CSS.

CERTIFICATIONS

Full Stack Java Certification – Wipro

Full Stack Web Development – Compsoft Technologies

EDUCATION

Bachelor of Engineering – Computer Science and Engineering

Cambridge Institute of Technology North Campus (2021 – 2025)
